Using NordLynx in the NordVPN app (Windows)

On Windows 7 and 8.1:

1. Install the NordVPN app for Windows and go to the **application settings** in the **bottom left corner**.

2. Select **Auto-connect** on the left side of the menu and make sure to turn off the "**Choose a VPN protocol and server automatically**" option. Afterward, click on the VPN protocol drop-down menu and select **NordLynx**.
