

## How to connect PureVPN on Mac

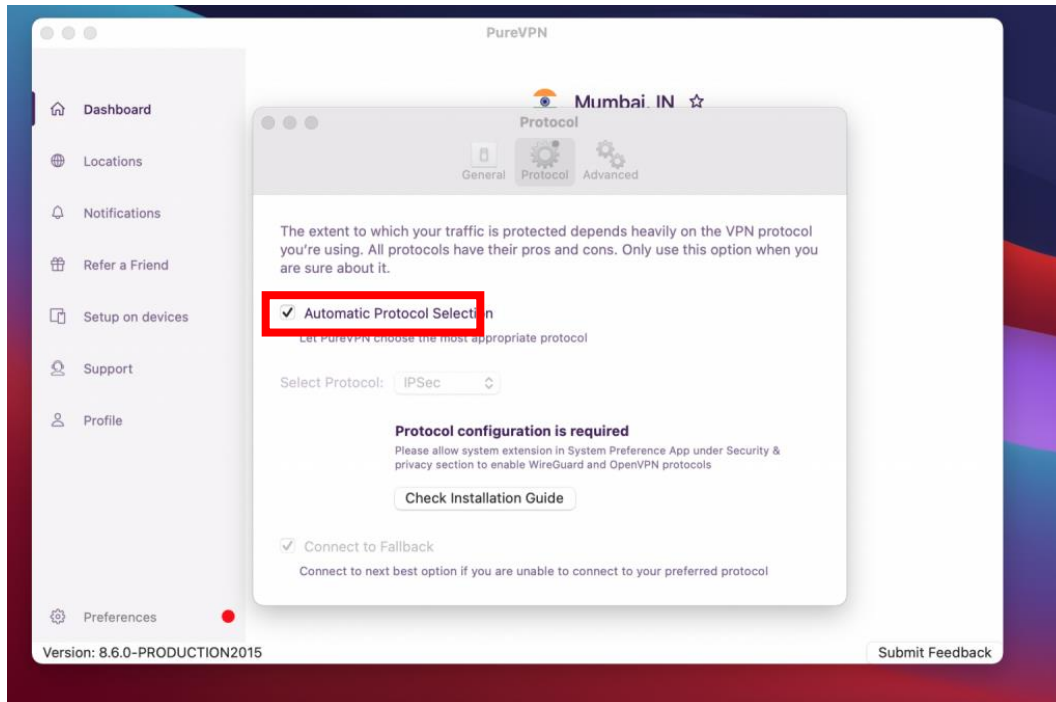

- Click the **preferences**  option at the left panel of the PureVPN app.

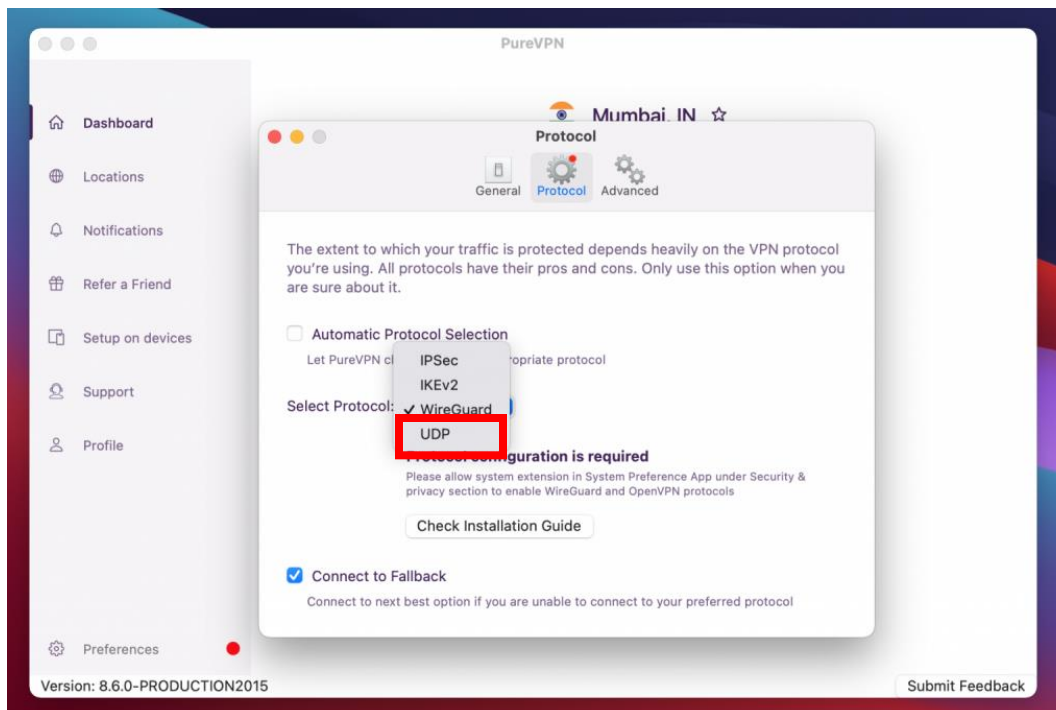

- From the general settings, select the **protocol** tab.

- Turn off **automatic protocol selection** to change your protocol selection.

- A warning will appear, click **proceed** to continue.
- Choose **UDP** protocol from the drop-down menu.

- Once done, click the **globe icon**  at the left panel of the PureVPN app.
- Choose any location to get connected.
